# Team 12 Project Presentation

# Team members

NATTHAKORN RATTANAKUN

DIGVIJAYSINH HEMANTSINH DEVDHARA

MOHAMMAND SHAHID SIRAJBHAI JAMADAR

QIAOQIAO ZOU

PONGSATORN KRABUANSANG

## Working on a calculator project

Reason: This program is essential for our learning track because engineering & technology are mostly related to numbers & calculation.

# Working process

1. Defined what roles we should have.
2. Assign a role to an appropriate team member.

| No | Name | Role |
|---|---|---|
| 1 | Natthakorn Rattanakun | Oral presentation |
| 2 | Digvijaysinh Hemantsinh Devdhara | Q & A session |
| 3 | Mohammand Shahid Sirajbhai Jamadar | Coding master |
| 4 | Qiaoqiao Zou | Coding support |
| 5 | Pongsatorn Krabuansang | Making slides & communication |

3. Each member prepares & finishes the jobs as assigned, then shares with other members for any further comments or suggestions.

# Challenges

- Most of us are totally new to complex coding, so we had to study hard.

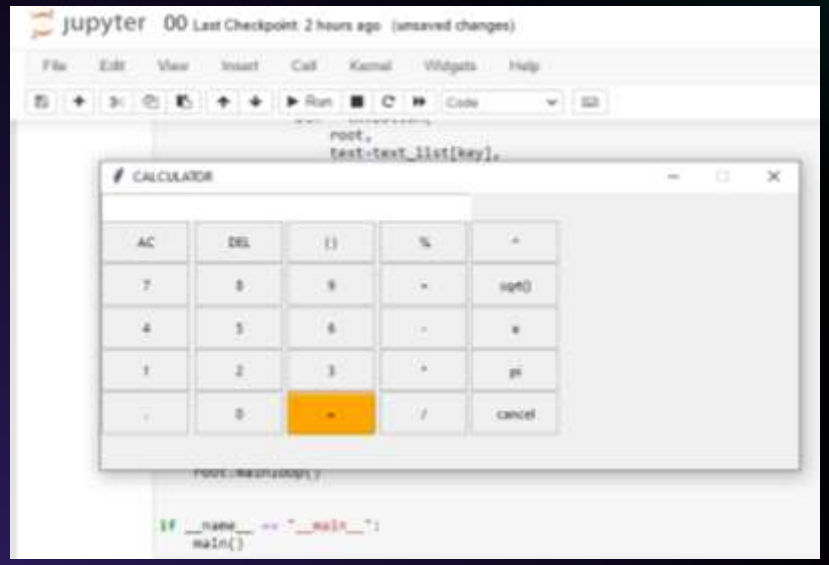
- We have some time zone differences so it made our communication, more difficult than we had expected.

# Teamwork

We always communicate & discuss what to do next via “WhatsApp” because it is easy to use & can help us overcome the challenges of time zone differences.

We created a group called “Team 12” in WhatsApp

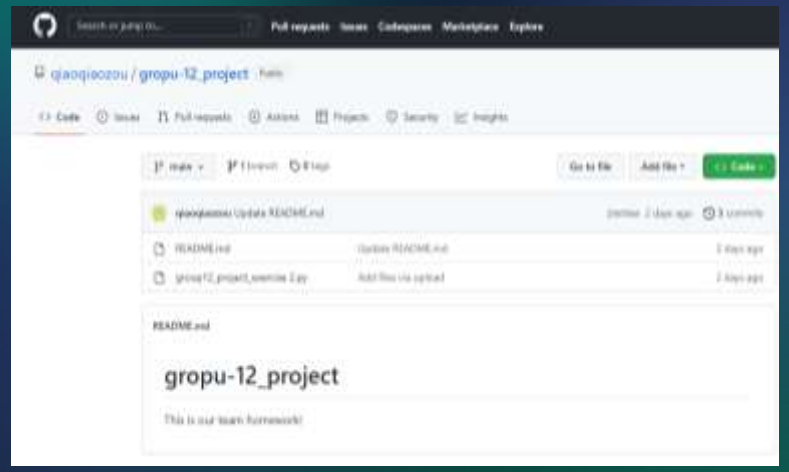
This is an example of the result of our coding & collaboration



**As far as we know it works well in all operations**

# Version control

We use GitHub to share working code and information for code revision & testing.



# Conclusion

Our project can be finished due to all members being collaborative & communicative.

# Evaluation

Criteria : 3 = Very good  2 = Good  1 = Acceptable  0 = Not good

| No. | Topic | Evaluation | Remark |
|---|---|---|---|
| 1 | How well is your teamwork | 3 | all team members are willingly do their parts. |
| 2 | How well is your project work | 3 | Our project is working well as expected. |
| 3 | How well is your team communication | 2 | We encoutered some late communication problem due to time zone differeces. |
| 4 | Have you familiar with using version control program | 3 | We used Github & Trello to support our cummunication & work. |
| 5 | Have you familiar with all codings | 2 | Some of us still not completely familiar with all codings. |
| Overall score | | 13 | * Sum of eva |
| **Average score** | | **2.6** | * Sum of eva/ topic no. |

## Summary

Although our team was not getting the full score for all evaluation topics, we think that this is quite impressive to have all members work together. Seems like it is a good start for more complex group work or projects in the near future. **Anyway, the average score of 2.6 is surely magnificent for the beginner.**

# Q & A Session

# Thank you very much!!

# Kiitos paljon!!

Best regards
Team 12
